# Product datasheet for TA367584

# Metabotropic Glutamate Receptor 4 (GRM4) Rabbit Polyclonal Antibody

## **Product data:**

Product Type:	Primary Antibodies
Applications:	IHC
Recommended Dilution:	IHC: 25-100 Positive control: Human breast cancer Predicted cell location: Cell membrane
Reactivity:	Human, Mouse, Rat
Host:	Rabbit
lsotype:	IgG
Clonality:	Polyclonal
Immunogen:	Synthetic peptide of human GRM4
Formulation:	pH7.4 PBS, 0.05% NaN3, 40% Glycerol
Concentration:	lot specific
Purification:	Antigen affinity purification
Conjugation:	Unconjugated
Storage:	Store at -20°C.
Stability:	1 year
Gene Name:	glutamate metabotropic receptor 4
Database Link:	<u>Entrez Gene 2914 Human</u> <u>Q14833</u>

This product is to be used for laboratory only. Not for diagnostic or therapeutic use. ©2022 OriGene Technologies, Inc., 9620 Medical Center Drive, Ste 200, Rockville, MD 20850, US

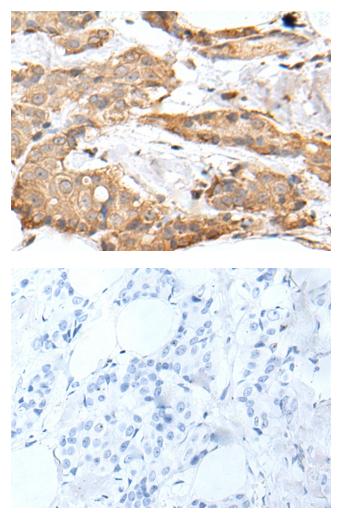

#### Section 2017 Secti

Background:L-glutamate is the major excitatory neurotransmitter in the central nervous system and<br/>activates both ionotropic and metabotropic glutamate receptors. Glutamatergic<br/>neurotransmission is involved in most aspects of normal brain function and can be<br/>perturbed in many neuropathologic conditions. The metabotropic glutamate receptors are a<br/>family of G protein-coupled receptors, that have been divided into 3 groups on the basis of<br/>sequence homology, putative signal transduction mechanisms, and pharmacologic<br/>properties. Group I includes GRM1 and GRM5 and these receptors have been shown to<br/>activate phospholipase C. Group II includes GRM2 and GRM3 while Group III includes GRM4,<br/>GRM6, GRM7 and GRM8. Group II and III receptors are linked to the inhibition of the cyclic<br/>AMP cascade but differ in their agonist selectivities. Several transcript variants encoding<br/>different isoforms have been found for this gene.

Synonyms:

GPRC1D; MGC177594; mGlu4; MGLUR4
