Storage: Stability: 1 year Gene Name: brain abundant membrane attached signal protein 1 Database Link: Entrez Gene 10409 Human P80723 **Background:** This gene encodes a membrane bound protein with several transient phosphorylation sites and PEST motifs. Conservation of proteins with PEST sequences among different species supports their functional significance. PEST sequences typically occur in proteins with high turnover rates. Immunological characteristics of this protein are species specific. This protein also undergoes N-terminal myristoylation. Alternative splicing results in multiple transcript variants that encode the same protein.
