

Product datasheet for **TA367889S**

BMP5 Rabbit Polyclonal Antibody

Product data:

Product Type:	Primary Antibodies
Applications:	WB
Recommended Dilution:	WB: 500-2000 WB positive control: Human placenta tissue and Human right lower lung tissue lysates
Reactivity:	Human, Mouse
Host:	Rabbit
Isotype:	IgG
Clonality:	Polyclonal
Immunogen:	Synthetic peptide of human BMP5
Formulation:	pH7.4 PBS, 0.05% NaN ₃ , 40% Glycerol
Purification:	Antigen affinity purification
Conjugation:	Unconjugated
Storage:	Store at -20°C.
Stability:	1 year
Predicted Protein Size:	52 kDa
Gene Name:	bone morphogenetic protein 5
Database Link:	Entrez Gene 653 Human P22003
Background:	This gene encodes a secreted ligand of the TGF-beta (transforming growth factor-beta) superfamily of proteins. Ligands of this family bind various TGF-beta receptors leading to recruitment and activation of SMAD family transcription factors that regulate gene expression. The encoded preproprotein is proteolytically processed to generate each subunit of the disulfide-linked homodimer, which plays a role in bone and cartilage development. Polymorphisms in this gene may be associated with osteoarthritis in human patients. This gene is differentially regulated in multiple human cancers. This gene encodes distinct protein isoforms that may be similarly proteolytically processed.
Synonyms:	BMP-5; MGC34244

Product images:

Gel: 8%SDS-PAGE

Lysate: 40 μ g

Lane 1-2: Human placenta tissue and Human right lower lung tissue lysates

Primary antibody: [TA367889] (BMP5 Antibody) at dilution 1/450

Secondary antibody: Goat anti rabbit IgG at 1/5000 dilution

Exposure time: 3 minutes
