

Product datasheet for TA367898S

C13orf24 (PIBF1) Rabbit Polyclonal Antibody

Product data:

OriGene Technologies, Inc.

9620 Medical Center Drive, Ste 200 Rockville, MD 20850, US Phone: +1-888-267-4436 https://www.origene.com techsupport@origene.com EU: info-de@origene.com CN: techsupport@origene.cn

Product Type:	Primary Antibodies
Applications:	IHC, WB
Recommended Dilution:	WB: 500-2000 WB positive control: 293TIHelaIK562 and 231 cell lysates IHC: 30-150 Positive control: Human colorectal cancer Predicted cell location: Cytoplasm
Reactivity:	Human
Host:	Rabbit
lsotype:	IgG
Clonality:	Polyclonal
Immunogen:	Synthetic peptide of human PIBF1
Formulation:	pH7.4 PBS, 0.05% NaN3, 40% Glycerol
Purification:	Antigen affinity purification
Conjugation:	Unconjugated
Storage:	Store at -20°C.
Stability:	1 year
Predicted Protein Size:	90 kDa
Gene Name:	progesterone immunomodulatory binding factor 1
Database Link:	<u>Entrez Gene 10464 Human</u> <u>Q8WXW3</u>

This product is to be used for laboratory only. Not for diagnostic or therapeutic use. ©2022 OriGene Technologies, Inc., 9620 Medical Center Drive, Ste 200, Rockville, MD 20850, US

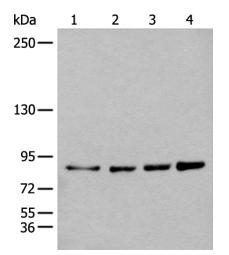

GRIGENE C13orf24 (PIBF1) Rabbit Polyclonal Antibody – TA367898S

Background:PIBF (Progesterone-Induced Blocking Factor 1) is synthesized during pregnancy in response
to progesterone by progesterone receptor-positive T lymphocytes (mostly gamma-delta T
cells). In the presence of PIBF, natural killer (NK) cells inhibit the release of perforin from
storage granules and therefore fail to lyse target cells. In humans, the amount of cells that
express PIBF is significantly higher in healthy pregnant women than in women at risk for
premature pregnancy termination. Full-length PIBF is associated with the nucleus, whereas
secretion of shorter forms is induced by activation of the cell. Research suggests that PIBF
functions as a transcription factor in its full-length form, while smaller forms may act as
cytokines. The PIBF gene encodes a deduced hydrophilic 757-amino acid alpha-helical protein
with an N-terminal signal sequence, a leucine zipper motif, a basic zipper sequence, a PEST
sequence, a nuclear localization signal, an endoplasmic reticulum membrane retention
signal, and many presumeed N-glycosylation and phosphorylation sites.

Synonyms:

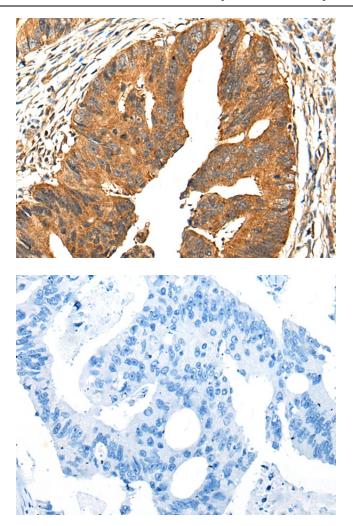

C13orf24; KIAA1008; PIBF; RP11-505F3.1

Product images:

Gel: 6%SDS-PAGE Lysate: 40 µg Lane 1-4: 293T Hela K562 and 231 cell lysates Primary antibody: [TA367898] (PIBF1 Antibody) at dilution 1/400 Secondary antibody: Goat anti rabbit IgG at 1/8000 dilution Exposure time: 1 minute
