

# Product datasheet for TA367935

## **PRKACA Rabbit Polyclonal Antibody**

## **Product data:**

#### **Product Type: Primary Antibodies Applications:** IHC, WB Recommended Dilution: WB: 200-1000 WB positive control: Human testis tissue lysate IHC: 25-100 Positive control: Human liver cancer Predicted cell location: Cytoplasm **Reactivity:** Human, Mouse, Rat Host: Rabbit Isotype: lgG **Clonality:** Polyclonal Immunogen: Synthetic peptide of human PRKACA pH7.4 PBS, 0.05% NaN3, 40% Glycerol Formulation: Concentration: lot specific **Purification:** Antigen affinity purification **Conjugation:** Unconjugated Storage: Store at -20°C. Stability: 1 year **Predicted Protein Size:** 41 kDa Gene Name: protein kinase cAMP-activated catalytic subunit alpha Database Link: Entrez Gene 5566 Human P17612

## **PRKACA Rabbit Polyclonal Antibody – TA367935**

Background: This gene encodes one of the catalytic subunits of protein kinase A, which exists as a tetrameric holoenzyme with two regulatory subunits and two catalytic subunits, in its inactive form. cAMP causes the dissociation of the inactive holoenzyme into a dimer of regulatory subunits bound to four cAMP and two free monomeric catalytic subunits. Four different regulatory subunits and three catalytic subunits have been identified in humans. cAMP-dependent phosphorylation of proteins by protein kinase A is important to many cellular processes, including differentiation, proliferation, and apoptosis. Constitutive activation of this gene caused either by somatic mutations, or genomic duplications of regions that include this gene, have been associated with hyperplasias and adenomas of the adrenal cortex and are linked to corticotropin-independent Cushing's syndrome. Alternative splicing results in multiple transcript variants encoding different isoforms. Tissue-specific isoforms that differ at the N-terminus have been described, and these isoforms may differ in the post-translational modifications that occur at the N-terminus of some isoforms.

Synonyms:

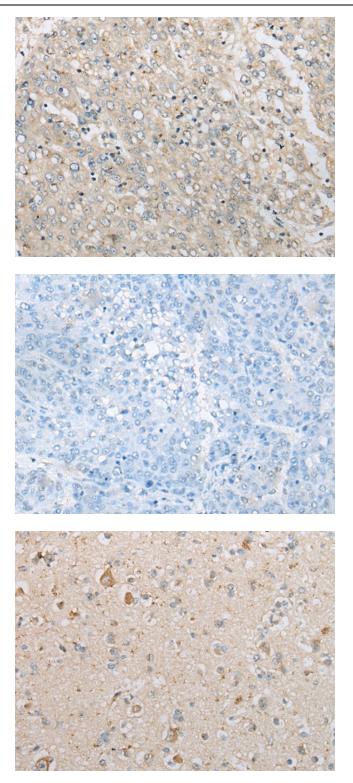

MGC48865; MGC102831; PKACA

## **Product images:**

Gel: 8%SDS-PAGE Lysate: 40 µg Lane: Human testis tissue lysate Primary antibody: TA367935 (PRKACA Antibody) at dilution 1/250 Secondary antibody: Goat anti rabbit IgG at 1/8000 dilution Exposure time: 3 seconds
