Background: The metallocarboxypeptidase family of enzymes is divided into 2 subfamilies based on

sequence similarities. The pancreatic carboxypeptidase-like and the regulatory B-type

carboxypeptidase subfamilies. Carboxypeptidase D has been identified as a regulatory B-type

carboxypeptidase. CPD is a homolog of duck gp180, a hepatitis B virus-binding protein. Transcript variants utilizing alternative polyadenylation signals exist for this gene.

Synonyms: GP180
