

Product datasheet for **TA368584S**

Pancreatic Polypeptide (PPY) Rabbit Polyclonal Antibody

Product data:

Product Type:	Primary Antibodies
Applications:	WB
Recommended Dilution:	WB: 1000-5000 WB positive control: Rat pancreas tissue lysate
Reactivity:	Human, Rat
Host:	Rabbit
Isotype:	IgG
Clonality:	Polyclonal
Immunogen:	Synthetic peptide of human PPY
Formulation:	pH7.4 PBS, 0.05% NaN ₃ , 40% Glycerol
Purification:	Antigen affinity purification
Conjugation:	Unconjugated
Storage:	Store at -20°C.
Stability:	1 year
Predicted Protein Size:	11 kDa
Gene Name:	pancreatic polypeptide
Database Link:	Entrez Gene 5539 Human P01298

Background: This gene encodes a member of the neuropeptide Y (NPY) family of peptides. The encoded 95 aa preproprotein is synthesized in the pancreatic islets of Langerhans and proteolytically processed to generate two peptide products. These products include the active pancreatic hormone of 36 aa and an icosapeptide of unknown function. This hormone acts as a regulator of pancreatic and gastrointestinal functions and may be important in the regulation of food intake. Plasma level of this hormone has been shown to be reduced in conditions associated with increased food intake and elevated in anorexia nervosa. In addition, infusion of this hormone in obese rodents has shown to decrease weight gain. Alternative splicing results in multiple transcript variants, at least one of which encodes an isoform that is proteolytically processed.

Synonyms: Obinepitide; PNP; PP

Product images:

Gel: 12%SDS-PAGE
Lysate: 40 μ g
Lane: Rat pancreas tissue lysate
Primary antibody: [TA368584] (PPY Antibody) at dilution 1/2500
Secondary antibody: Goat anti rabbit IgG at 1/5000 dilution
Exposure time: 3 minutes
