

Product datasheet for **TA368958S**

MARK1 Rabbit Polyclonal Antibody

Product data:

Product Type:	Primary Antibodies
Applications:	WB
Recommended Dilution:	WB: 500-2000 WB positive control: Mouse heart and brain tissue
Reactivity:	Human, Mouse, Rat
Host:	Rabbit
Isotype:	IgG
Clonality:	Polyclonal
Immunogen:	Fusion protein of human MARK1
Formulation:	pH7.4 PBS, 0.05% NaN ₃ , 40% Glycerol
Purification:	Antigen affinity purification
Conjugation:	Unconjugated
Storage:	Store at -20°C.
Stability:	1 year
Predicted Protein Size:	89 kDa
Gene Name:	microtubule affinity regulating kinase 1
Database Link:	Entrez Gene 4139 Human Q9P0L2
Background:	MAP/microtubule affinity-regulating kinase 1 (MARK1) is a 795 amino acid protein belonging to the CAMK Ser/Thr protein kinase family. MARK1 is thought to play a role in the stability of the microtubule matrix of the cytoskeleton. MARK1 is activated by phosphorylation of Thr215 by LKB1 in complex with STRAD and MO25. Localized to the cytoskeleton, MARK1 contains one kinase-associated (KA1) domain, one protein kinase domain and one UBA domain. Expressed as three isoforms produced by alternative splicing, MARK1 is found with highest levels in brain, skeletal muscle and heart.
Synonyms:	KIAA1477; MARK; MGC126512; MGC126513

Product images:

Gel: 6%SDS-PAGE

Lysate: 40 μ g

Lane 1-2: Mouse heart tissue

Mouse brain tissue

Primary antibody: [TA368958] (MARK1 Antibody)
at dilution 1/500

Secondary antibody: Goat anti rabbit IgG at
1/8000 dilution

Exposure time: 40 seconds
