## Product datasheet for TA369791S

## UNC13B Rabbit Polyclonal Antibody

## Product data:

| Product Type: | Primary Antibodies |
| :--- | :--- |
| Applications: | IHC |
| Recommended Dilution: | IHC: 30-150 |
|  | Positive control: Human colorectal cancer <br> Predicted cell location: Cytoplasm |
| Reactivity: | Human, Mouse, Rat |
| Host: | Rabbit |
| Isotype: | IgG |
| Clonality: | Polyclonal |
| Immunogen: | Fusion protein of human UNC13B |
| Formulation: | pH7.4 PBS, 0.05\% NaN3, 40\% Glycerol |
| Purification: | Antigen affinity purification |
| Conjugation: | Unconjugated |
| Storage: | Store at -20C. |
| Stability: | 1 year |
| Gene Name: | unc-13 homolog B (C. elegans) |
| Database Link: | $\underline{\text { Entrez Gene 10497 Human }}$ |
|  | $\underline{\text { O14795 }}$ |

Background: This gene is expressed in the kidney cortical epithelial cells and is upregulated by hyperglycemia. The encoded protein shares a high level of similarity to the rat homolog, and contains 3 C2 domains and a diacylglycerol-binding C1 domain. Hyperglycemia increases the levels of diacylglycerol, which has been shown to induce apoptosis in cells transfected with this gene and thus contribute to the renal cell complications of hyperglycemia. Studies in other species also indicate a role for this protein in the priming step of synaptic vesicle exocytosis.
Synonyms: hmunc13; MGC133279; MGC133280; MUNC13; Munc13-2; unc-13-like; UNC13; Unc13h2
