

# Product datasheet for TA370266S

## **ORC1 Rabbit Polyclonal Antibody**

### **Product data:**

**Product Type: Primary Antibodies** IHC **Applications:** Recommended Dilution: IHC: 25-100 Positive control: Human esophagus cancer Predicted cell location: Nucleus **Reactivity:** Human, Mouse, Rat Host: Rabbit Isotype: lgG **Clonality:** Polyclonal Immunogen: Fusion protein of human ORC1 Formulation: pH7.4 PBS, 0.05% NaN3, 40% Glycerol **Purification:** Antigen affinity purification **Conjugation:** Unconjugated Store at -20°C. Storage: Stability: 1 year Gene Name: origin recognition complex subunit 1 Database Link: Entrez Gene 4998 Human Q13415 Background: The origin recognition complex (ORC) is a highly conserved six subunits protein complex essential for the initiation of the DNA replication in eukaryotic cells. Studies in yeast demonstrated that ORC binds specifically to origins of replication and serves as a platform for the assembly of additional initiation factors such as Cdc6 and Mcm proteins. The protein encoded by this gene is the largest subunit of the ORC complex. While other ORC subunits are stable throughout the cell cycle, the levels of this protein vary during the cell cycle, which has

different isoforms have been found for this gene.

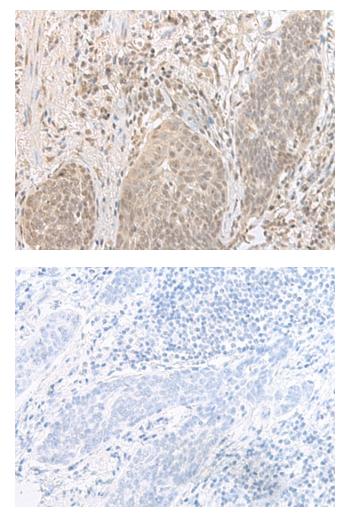

been shown to be controlled by ubiquitin-mediated proteolysis after initiation of DNA replication. This protein is found to be selectively phosphorylated during mitosis. It is also reported to interact with MYST histone acetyltransferase 2 (MyST2/HBO1), a protein involved

in control of transcription silencing. Alternatively spliced transcript variants encoding
