| Product Type:         | Primary Antibodies   |
|-----------------------|--|
| Applications:         | IHC  |
| Recommended Dilution: | IHC: 50-300<br>Positive control: Human tonsil<br>Predicted cell location: Cytoplasm  |
| Reactivity:           | Human  |
| Host:                 | Rabbit   |
| lsotype:              | IgG  |
| Clonality:            | Polyclonal   |
| Immunogen:            | Fusion protein of human PPM1B  |
| Formulation:          | pH7.4 PBS, 0.05% NaN3, 40% Glycerol  |
| Purification:         | Antigen affinity purification  |
| Conjugation:          | Unconjugated   |
| Storage:              | Store at -20°C.  |
| Stability:            | 1 year   |
| Gene Name:            | protein phosphatase, Mg2+/Mn2+ dependent 1B  |
| Database Link:        | <u>Entrez Gene 5495 Human</u><br><u>O75688</u>   |
| Background:           | The protein encoded by this gene is a member of the PP2C family of Ser/Thr protein<br>phosphatases. PP2C family members are known to be negative regulators of cell stress<br>response pathways. This phosphatase has been shown to dephosphorylate cyclin-dependent<br>kinases (CDKs), and thus may be involved in cell cycle control. Overexpression of this<br>phosphatase is reported to cause cell-growth arrest or cell death. Alternative splicing results<br>in multiple transcript variants encoding different isoforms. Additional transcript variants have<br>been described, but currently do not represent full-length sequences. |
| Synonyms:             | MGC21657; PP2C-beta; PP2C-beta-X; PP2CB; PP2CBETA; PPC2BETAX   |
