Background: The human protein FAM82A1, also known as regulator of microtubule dynamics 2 (RMD2),

was one of three proteins identified as related to a family of microtubule-associated proteins in C. elegans. FAM82A1 contains multiple coiled-coil domains and localize to the spindle microtubules and spindle poles during cell division. During interphase, RMD2 localizes to the

cytoplasm with protein observed in the microtubule lattice and perinuclear region.
