

Product datasheet for TA370938S

Sumo 1 (SUMO1) Rabbit Polyclonal Antibody

P63165

Product data:

Host:

Isotype:

Clonality:

Storage: Stability:

Product Type: Primary Antibodies IHC **Applications:** Recommended Dilution: IHC: 50-100 Positive control: Human prostate cancer Predicted cell location: Nucleus **Reactivity:** Human, Mouse, Rat Rabbit lgG Polyclonal Immunogen: Fusion protein of human SUMO1 Formulation: pH7.4 PBS, 0.05% NaN3, 40% Glycerol **Purification:** Antigen affinity purification **Conjugation:** Unconjugated Store at -20°C. 1 year Gene Name: small ubiquitin-like modifier 1 Database Link: Entrez Gene 7341 Human

Background:

This gene encodes a multifunctional protein that is involved in various cellular processes, including gene expression, cell signaling, and RNA processing and transport. The protein includes an N-terminal transcriptional activation domain and a C-terminal RNA-binding domain. Chromosomal translocations between this gene and various genes encoding transcription factors result in the production of chimeric proteins that are involved in tumorigenesis. These chimeric proteins usually consist of the N-terminal transcriptional activation domain of this protein fused to the C-terminal DNA-binding domain of the transcription factor protein. Mutations in this gene, specifically a t(11;22)(q24;q12) translocation, are known to cause Ewing sarcoma as well as neuroectodermal and various other tumors. Alternative splicing of this gene results in multiple transcript variants. Related pseudogenes have been identified on chromosomes 1 and 14.
