

Product datasheet for TA371645

Exodus 2 (CCL21) Rabbit Polyclonal Antibody

WB

Human Rabbit

Polyclonal

lot specific

Unconjugated

Store at -20°C.

1 year

15 kDa

000585

Synthetic peptide of human CCL21

Antigen affinity purification

C-C motif chemokine ligand 21

Entrez Gene 6366 Human

pH7.4 PBS, 0.05% NaN3, 40% Glycerol

lgG

Primary Antibodies

WB positive control: Human lymph gland tissue lysate

WB: 500-2000

	Exodus 2 (CCL21) Rabbit Polyclonal Antibody – TA371645
Background:	This antimicrobial gene is one of several CC cytokine genes clustered on the p-arm of chromosome 9. Cytokines are a family of secreted proteins involved in immunoregulatory and inflammatory processes. The CC cytokines are proteins characterized by two adjacent cysteines. Similar to other chemokines the protein encoded by this gene inhibits hemopoiesis and stimulates chemotaxis. This protein is chemotactic in vitro for thymocytes and activated T cells, but not for B cells, macrophages, or neutrophils. The cytokine encoded by this gene may also play a role in mediating homing of lymphocytes to secondary lymphoid organs. It is a high affinity functional ligand for chemokine receptor 7 that is expressed on T and B lymphocytes and a known receptor for another member of the cytokine family (small inducible cytokine A19).

Synonyms:

6Ckine; CKb9; ECL; exodus-2; MGC34555; SCYA21; SLC; TCA4
