

Product datasheet for TA371722S

DEK Rabbit Polyclonal Antibody

Product data:

Product Type: Primary Antibodies

Applications: IHC

Recommended Dilution: IHC: 25-100

Positive control: Human tonsil Predicted cell location: Nucleus

Reactivity: Human, Rat

Host: Rabbit Isotype: IgG

Clonality: Polyclonal

Immunogen: Synthetic peptide of human DEK

Formulation: pH7.4 PBS, 0.05% NaN3, 40% Glycerol

Concentration: lot specific

Purification: Antigen affinity purification

Conjugation: Unconjugated Storage: Store at -20°C.

Stability: 1 year

Gene Name: DEK proto-oncogene

Database Link: Entrez Gene 7913 Human

P35659

Background: This gene encodes a protein with one SAP domain. This protein binds to cruciform and

superhelical DNA and induces positive supercoils into closed circular DNA, and is also

involved in splice site selection during mRNA processing. Chromosomal aberrations involving this region, increased expression of this gene, and the presence of antibodies against this protein are all associated with various diseases. Two transcript variants encoding different

isoforms have been found for this gene.

Synonyms: D6S231E
