

Product datasheet for **TA371889**

FSH beta (FSHB) Rabbit Polyclonal Antibody

Product data:

Product Type:	Primary Antibodies
Applications:	IHC, WB
Recommended Dilution:	WB: 200-1000 WB positive control: HL-60 cell lysate IHC: 20-100 Positive control: Human colorectal cancer Predicted cell location: Secreted
Reactivity:	Human, Mouse, Rat
Host:	Rabbit
Isotype:	IgG
Clonality:	Polyclonal
Immunogen:	Synthetic peptide of human FSHB
Formulation:	pH7.4 PBS, 0.05% NaN ₃ , 40% Glycerol
Concentration:	lot specific
Purification:	Antigen affinity purification
Conjugation:	Unconjugated
Storage:	Store at -20°C.
Stability:	1 year
Predicted Protein Size:	15 kDa
Gene Name:	follicle stimulating hormone beta subunit
Database Link:	Entrez Gene 2488 Human P01225

Background: The pituitary glycoprotein hormone family includes follicle-stimulating hormone, luteinizing hormone, chorionic gonadotropin, and thyroid-stimulating hormone. All of these glycoproteins consist of an identical alpha subunit and a hormone-specific beta subunit. This gene encodes the beta subunit of follicle-stimulating hormone. In conjunction with luteinizing hormone, follicle-stimulating hormone induces egg and sperm production. Alternative splicing results in two transcript variants encoding the same protein.

Synonyms: FSH-B; FSH-beta

Product images:

Gel: 12%SDS-PAGE
Lysate: 40 μ g
Lane: HL-60 cell lysate
Primary antibody: TA371889 (FSHB Antibody) at dilution 1/200
Secondary antibody: Goat anti rabbit IgG at 1/8000 dilution
Exposure time: 20 seconds

Immunohistochemistry of paraffin-embedded Human colorectal cancer tissue using TA371889 (FSHB Antibody) at dilution 1/30 (Original magnification: \times 200)

Immunohistochemistry of paraffin-embedded Human colorectal cancer tissue using TA371889 (FSHB Antibody) at dilution 1/30, treated with synthetic peptide. (Original magnification: ×200)
