

# Product datasheet for TA372199

## **CD51 (ITGAV) Rabbit Polyclonal Antibody**

### **Product data:**

Host:

#### **Product Type: Primary Antibodies** IHC **Applications:** IHC: 25-50 Recommended Dilution: Positive control: Human colorectal cancer Predicted cell location: Cytoplasm and Cell membrane **Reactivity:** Human, Mouse Rabbit Isotype: lgG **Clonality:** Polyclonal Immunogen: Synthetic peptide of human ITGAV Formulation: pH7.4 PBS, 0.05% NaN3, 40% Glycerol **Concentration:** lot specific Purification: Antigen affinity purification **Conjugation:** Unconjugated Store at -20°C. Storage: Stability: 1 year Gene Name: integrin subunit alpha V Database Link: Entrez Gene 3685 Human P06756 Background: The product of this gene belongs to the integrin alpha chain family. Integrins are heterodimeric integral membrane proteins composed of an alpha subunit and a beta subunit that function in cell surface adhesion and signaling. The encoded preproprotein is proteolytically processed to generate light and heavy chains that comprise the alpha V subunit. This subunit associates with beta 1, beta 3, beta 5, beta 6 and beta 8 subunits. The heterodimer consisting of alpha V and beta 3 subunits is also known as the vitronectin receptor. This integrin may regulate angiogenesis and cancer progression. Alternative splicing results in multiple transcript variants. Note that the integrin alpha 5 and integrin alpha V subunits are encoded by distinct genes.
