

Product datasheet for TA372349

ARF3 Rabbit Polyclonal Antibody

Product data:

Product Type: Primary Antibodies

Applications: IHC

Recommended Dilution: IHC: 25-100

Positive control: Human liver cancer Predicted cell location: Cytoplasm

Reactivity: Human, Mouse, Rat

Host: Rabbit Isotype: IgG

Clonality: Polyclonal

Immunogen: Synthetic peptide of human ARF3

Formulation: pH7.4 PBS, 0.05% NaN3, 40% Glycerol

Concentration: lot specific

Purification: Antigen affinity purification

Conjugation: Unconjugated Storage: Store at -20°C.

Stability: 1 year

Gene Name: ADP ribosylation factor 3

Database Link: Entrez Gene 377 Human

P61204

Background: ADP-ribosylation factor 3 (ARF3) is a member of the human ARF gene family. These genes

encode small guanine nucleotide-binding proteins that stimulate the ADP-ribosyltransferase

activity of cholera toxin and play a role in vesicular trafficking and as activators of

phospholipase D. The gene products include 6 ARF proteins and 11 ARF-like proteins and constitute 1 family of the RAS superfamily. The ARF proteins are categorized as class I (ARF1, ARF2, and ARF3), class II (ARF4 and ARF5) and class III (ARF6) and members of each class share

a common gene organization. The ARF3 gene contains five exons and four introns.

Synonyms: ARF3
