

# Product datasheet for TA372410S

# Fbx32 (FBXO32) Rabbit Polyclonal Antibody

## **Product data:**

Product Type:	Primary Antibodies
Applications:	IHC
Recommended Dilution:	IHC: 30-150 Positive control: Human liver cancer Predicted cell location: Cytoplasm or Nucleus
Reactivity:	Human, Mouse, Rat
Host:	Rabbit
lsotype:	IgG
Clonality:	Polyclonal
Immunogen:	Synthetic peptide of human FBXO32
Formulation:	pH7.4 PBS, 0.05% NaN3, 40% Glycerol
Concentration:	lot specific
Purification:	Antigen affinity purification
Conjugation:	Unconjugated
Storage:	Store at -20°C.
Stability:	1 year
Gene Name:	F-box protein 32
Database Link:	<u>Entrez Gene 114907 Human</u> <u>Q969P5</u>

### Source Fbx32 (FBXO32) Rabbit Polyclonal Antibody – TA372410S

Background:This gene encodes a member of the F-box protein family which is characterized by an<br/>approximately 40 amino acid motif, the F-box. The F-box proteins constitute one of the four<br/>subunits of the ubiquitin protein ligase complex called SCFs (SKP1-cullin-F-box), which<br/>function in phosphorylation-dependent ubiquitination. The F-box proteins are divided into 3<br/>classes: Fbws containing WD-40 domains, Fbls containing leucine-rich repeats, and Fbxs<br/>containing either different protein-protein interaction modules or no recognizable motifs. The<br/>protein encoded by this gene belongs to the Fbxs class and contains an F-box domain. This<br/>protein is highly expressed during muscle atrophy, whereas mice deficient in this gene were<br/>found to be resistant to atrophy. This protein is thus a potential drug target for the treatment<br/>of muscle atrophy. Alternative splicing results in multiple transcript variants encoding<br/>different isoforms.

Synonyms:

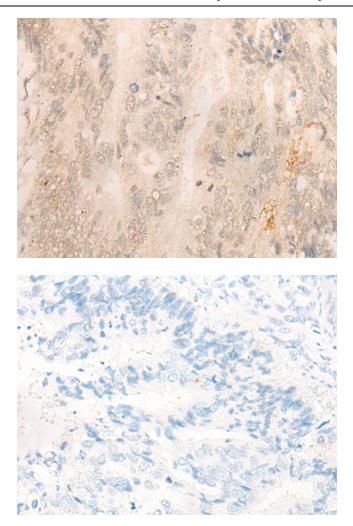

Atrogin-1; ATROGIN1; Fbx32; FLJ32424; MAFbx; MGC33610
