

## **Product datasheet for TA372763**

## IF 2(Mt) (MTIF2) Rabbit Polyclonal Antibody

## **Product data:**

**Product Type:** Primary Antibodies

Applications: IHC

Recommended Dilution: IHC: 20-100

Positive control: Human brain Predicted cell location: Cytoplasm

Reactivity: Human
Host: Rabbit
Isotype: IgG

Clonality: Polyclonal

Immunogen:Synthetic peptide of human MTIF2Formulation:pH7.4 PBS, 0.05% NaN3, 40% Glycerol

**Concentration:** lot specific

**Purification:** Antigen affinity purification

Conjugation: Unconjugated Storage: Store at -20°C.

Stability: 1 year

**Gene Name:** mitochondrial translational initiation factor 2

**Database Link:** Entrez Gene 4528 Human

P46199

**Background:** During the initiation of protein biosynthesis, initiation factor-2 (IF-2) promotes the binding of

the initiator tRNA to the small subunit of the ribosome in a GTP-dependent manner.

Prokaryotic IF-2 is a single polypeptide, while eukaryotic cytoplasmic IF-2 (eIF-2) is a trimeric protein. Bovine liver mitochondria contain IF-2(mt), an 85-kD monomeric protein that is equivalent to prokaryotic IF-2. The predicted 727-amino acid human protein contains a 29-amino acid presequence. Human IF-2(mt) shares 32 to 38% amino acid sequence identity with yeast IF-2(mt) and several prokaryotic IF-2s, with the greatest degree of conservation in the G

domains of the proteins.

Synonyms: IF-2(Mt); IF-2mt; IF2(mt); OTTHUMP00000200773
