Product Type:	Primary Antibodies
Applications:	ICC/IF, IHC, WB
Recommended Dilution:	WB,1:500 - 1:2000 IHC,1:50 - 1:200 IF,1:50 - 1:200
Reactivity:	Human, Mouse, Rat
Modifications:	Unmodified
Host:	Rabbit
lsotype:	lgG
Clonality:	Polyclonal
Immunogen:	Recombinant fusion protein containing a sequence corresponding to amino acids 1-408 of human ACY1 (NP_001185824.1).
Formulation:	Buffer: PBS with 0.02% sodium azide,50% glycerol,pH7.3.
Concentration:	lot specific
Purification:	Affinity purification
Conjugation:	Unconjugated
Storage:	Store at -20°C. Avoid freeze / thaw cycles.
Stability:	Shelf life: one year from despatch.
Predicted Protein Size:	37kDa/38kDa/42kDa/45kDa
Gene Name:	aminoacylase 1
Database Link:	<u>Entrez Gene 95 Human</u> <u>Q03154</u>

This product is to be used for laboratory only. Not for diagnostic or therapeutic use. ©2025 OriGene Technologies, Inc., 9620 Medical Center Drive, Ste 200, Rockville, MD 20850, US

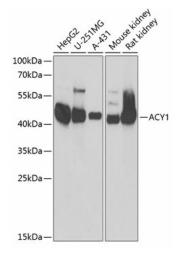

#### Serigene Aminoacylase 1 (ACY1) Rabbit Polyclonal Antibody – TA373244S

Background:This gene encodes a cytosolic, homodimeric, zinc-binding enzyme that catalyzes the<br/>hydrolysis of acylated L-amino acids to L-amino acids and an acyl group, and has been<br/>postulated to function in the catabolism and salvage of acylated amino acids. This gene is<br/>located on chromosome 3p21.1, a region reduced to homozygosity in small-cell lung cancer<br/>(SCLC), and its expression has been reported to be reduced or undetectable in SCLC cell lines<br/>and tumors. The amino acid sequence of human aminoacylase-1 is highly homologous to the<br/>porcine counterpart, and this enzyme is the first member of a new family of zinc-binding<br/>enzymes. Mutations in this gene cause aminoacylase-1 deficiency, a metabolic disorder<br/>characterized by central nervous system defects and increased urinary excretion of N-<br/>acetylated amino acids. Alternative splicing of this gene results in multiple transcript variants.<br/>Read-through transcription also exists between this gene and the upstream ABHD14A<br/>(abhydrolase domain containing 14A) gene, as represented in GeneID:100526760. A related<br/>pseudogene has been identified on chromosome 18.

Synonyms:

ACY-1; ACY1D; ACYLASE

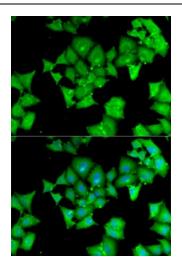

### **Product images:**

Western blot analysis of extracts of various cell lines, using ACY1 antibody ([TA373244]) at 1:1000 dilution. | Secondary antibody: HRP Goat Anti-Rabbit IgG (H+L) at 1:10000 dilution. | Lysates/proteins: 25ug per lane. | Blocking buffer: 3% nonfat dry milk in TBST.
