

Product datasheet for TA373487

AMHR2 Rabbit Polyclonal Antibody

Product data:

Product Type: Primary Antibodies

Applications: WB

Reactivity: WB,1:500 - 1:2000 **Reactivity:** Human, Mouse, Rat

Modifications: Unmodified

Host: Rabbit Isotype: IgG

Clonality: Polyclonal

Immunogen: Recombinant fusion protein containing a sequence corresponding to amino acids 18-149 of

human AMHR2 (NP_065434.1).

Formulation: Buffer: PBS with 0.02% sodium azide,50% glycerol,pH7.3.

Concentration: lot specific

Purification: Affinity purification

Conjugation: Unconjugated

Storage: Store at -20°C. Avoid freeze / thaw cycles.

Stability: Shelf life: one year from despatch.

Predicted Protein Size: 51kDa/52kDa/62kDa

Gene Name: anti-Mullerian hormone receptor type 2

Database Link: Entrez Gene 269 Human

Q16671

Background: This gene encodes the receptor for the anti-Mullerian hormone (AMH) which, in addition to

testosterone, results in male sex differentiation. AMH and testosterone are produced in the testes by different cells and have different effects. Testosterone promotes the development

of male genitalia while the binding of AMH to the encoded receptor prevents the

development of the mullerian ducts into uterus and Fallopian tubes. Mutations in this gene

are associated with persistent Mullerian duct syndrome type II. Alternatively spliced

transcript variants encoding different isoforms have been identified.
