| Background:             | This gene is one of two human homologs of Drosophila bicaudal-D and a member of the<br>Bicoid family. It has been implicated in dynein-mediated, minus end-directed motility along<br>microtubules. It has also been reported to be a phosphorylation target of NIMA related<br>kinase 8. Two alternative splice variants have been described. |
