# Product datasheet for TA374062

# **BRCA1 Rabbit Polyclonal Antibody**

# **Product data:**

Product Type:	Primary Antibodies
Applications:	ICC/IF, WB
Recommended Dilution:	WB,1:500 - 1:2000 IF,1:50 - 1:200
Reactivity:	Human, Mouse, Rat
Modifications:	Unmodified
Host:	Rabbit
lsotype:	IgG
Clonality:	Polyclonal
Immunogen:	Recombinant fusion protein containing a sequence corresponding to amino acids 400-699 of human BRCA1 (NP_009230.2).
Formulation:	Buffer: PBS with 0.02% sodium azide,50% glycerol,pH7.3.
Concentration:	lot specific
Purification:	Affinity purification
Conjugation:	Unconjugated
Storage:	Store at -20°C. Avoid freeze / thaw cycles.
Stability:	Shelf life: one year from despatch.
Predicted Protein Size:	7kDa/78-85kDa/202-210kDa
Gene Name:	BRCA1, DNA repair associated
Database Link:	<u>Entrez Gene 672 Human</u> <u>P38398</u>

This product is to be used for laboratory only. Not for diagnostic or therapeutic use. ©2023 OriGene Technologies, Inc., 9620 Medical Center Drive, Ste 200, Rockville, MD 20850, US

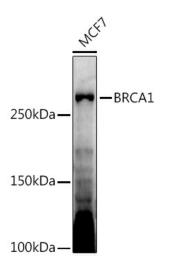

#### **GRIGENE** BRCA1 Rabbit Polyclonal Antibody – TA374062

Background:This gene encodes a nuclear phosphoprotein that plays a role in maintaining genomic<br/>stability, and it also acts as a tumor suppressor. The encoded protein combines with other<br/>tumor suppressors, DNA damage sensors, and signal transducers to form a large multi-<br/>subunit protein complex known as the BRCA1-associated genome surveillance complex<br/>(BASC). This gene product associates with RNA polymerase II, and through the C-terminal<br/>domain, also interacts with histone deacetylase complexes. This protein thus plays a role in<br/>transcription, DNA repair of double-stranded breaks, and recombination. Mutations in this<br/>gene are responsible for approximately 40% of inherited breast cancers and more than 80%<br/>of inherited breast and ovarian cancers. Alternative splicing plays a role in modulating the<br/>subcellular localization and physiological function of this gene. Many alternatively spliced<br/>transcript variants, some of which are disease-associated mutations, have been described for<br/>this gene, but the full-length natures of only some of these variants has been described. A<br/>related pseudogene, which is also located on chromosome 17, has been identified.

Synonyms:

BRCAI; BRCC1; BROVCA1; IRIS; PSCP; RNF53

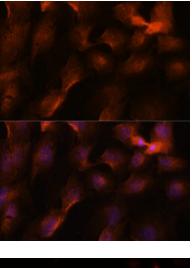

## **Product images:**

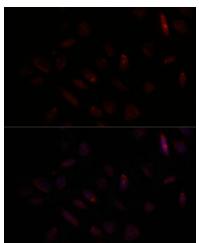

Western blot analysis of extracts of MCF7 cells, using (TA374062) at 1:500 dilution. | Secondary antibody: HRP Goat Anti-Rabbit IgG (H+L) at 1:10000 dilution. | Lysates/proteins: 25ug per lane. | Blocking buffer: 3% nonfat dry milk in TBST. | Detection: ECL Enhanced Kit . | Exposure time: 90s.
