

Product datasheet for TA374158S

Complement C5 (C5) Rabbit Polyclonal Antibody

Product data:

Product Type: Primary Antibodies Applications: ELISA, WB Recommended Dilution: WB.1:500 - 1:1000 ELISA, Recommended starting concentration is 1 µg/mL. Please optimize the concentration based on your specific assay requirements. **Reactivity:** Human, Mouse, Rat Modifications: Unmodified Rabbit Host: Isotype: lgG Polyclonal **Clonality:** Formulation: Buffer: PBS with 0.02% sodium azide,50% glycerol,pH7.3. Concentration: lot specific Purification: Affinity purification **Conjugation:** Unconjugated Store at -20°C. Avoid freeze / thaw cycles. Storage: Stability: Shelf life: one year from despatch. **Predicted Protein Size:** 188kDa Gene Name: complement component 5 Database Link: Entrez Gene 727 Human P01031

GRIGENE Complement C5 (C5) Rabbit Polyclonal Antibody – TA374158S

Background:This gene encodes a component of the complement system, a part of the innate immune
system that plays an important role in inflammation, host homeostasis, and host defense
against pathogens. The encoded preproprotein is proteolytically processed to generate
multiple protein products, including the C5 alpha chain, C5 beta chain, C5a anaphylatoxin and
C5b. The C5 protein is comprised of the C5 alpha and beta chains, which are linked by a
disulfide bridge. Cleavage of the alpha chain by a convertase enzyme results in the formation
of the C5a anaphylatoxin, which possesses potent spasmogenic and chemotactic activity, and
the C5b macromolecular cleavage product, a subunit of the membrane attack complex (MAC).
Mutations in this gene cause complement component 5 deficiency, a disease characterized by
recurrent bacterial infections. Alternative splicing results in multiple transcript variants.

Synonyms:

CPAMD4; FLI17816; FLI17822; MGC142298
