

Product datasheet for TA375371

Product datasneet for TAS/33/

DDIT3 Rabbit Polyclonal Antibody

Product data:

Product Type: Primary Antibodies

Applications: WB

Recommended Dilution: WB,1:500 - 1:2000

Reactivity: Mouse

Modifications: Unmodified

Host: Rabbit Isotype: IgG

Clonality: Polyclonal

Immunogen: Recombinant fusion protein containing a sequence corresponding to amino acids 1-100 of

human DDIT3/CHOP (NP_004074.2).

Formulation: Buffer: PBS with 0.02% sodium azide,50% glycerol,pH7.3.

Concentration: lot specific

Purification: Affinity purification

Conjugation: Unconjugated

Storage: Store at -20°C. Avoid freeze / thaw cycles.

Stability: Shelf life: one year from despatch.

Predicted Protein Size: 19kDa/21kDa

Gene Name: DNA damage inducible transcript 3

Database Link: P35638

Background: This gene encodes a member of the CCAAT/enhancer-binding protein (C/EBP) family of

transcription factors. The protein functions as a dominant-negative inhibitor by forming heterodimers with other C/EBP members, such as C/EBP and LAP (liver activator protein), and

preventing their DNA binding activity. The protein is implicated in adipogenesis and

erythropoiesis, is activated by endoplasmic reticulum stress, and promotes apoptosis. Fusion

of this gene and FUS on chromosome 16 or EWSR1 on chromosome 22 induced by translocation generates chimeric proteins in myxoid liposarcomas or Ewing sarcoma.

Multiple alternatively spliced transcript variants encoding two isoforms with different length

have been identified.
