

Product datasheet for TA375684

WB

Mouse

Rabbit

lgG

Unmodified

Polyclonal

lot specific

44kDa

Q16254

Affinity purification

Unconjugated

Primary Antibodies

WB,1:1000 - 1:2000

Recombinant protein of human E2F4.

Store at -20°C. Avoid freeze / thaw cycles.

Shelf life: one year from despatch.

E2F transcription factor 4

Buffer: PBS with 0.02% sodium azide, 50% glycerol, pH7.3.

E2F4 Rabbit Polyclonal Antibody

	E2F4 Rabbit Polyclonal Antibody – TA375684
--	--

E2F-4

Background: The protein encoded by this gene is a member of the E2F family of transcription factors. The E2F family plays a crucial role in the control of cell cycle and action of tumor suppressor proteins and is also a target of the transforming proteins of small DNA tumor viruses. The E2F proteins contain several evolutionally conserved domains found in most members of the family. These domains include a DNA binding domain, a dimerization domain which determines interaction with the differentiation regulated transcription factor protein (DP), a transactivation domain enriched in acidic amino acids, and a tumor suppressor protein association domain which is embedded within the transactivation domain. This protein binds to all three of the tumor suppressor proteins pRB, p107 and p130, but with higher affinity to the last two. It plays an important role in the suppression of proliferation-associated genes, and its gene mutation and increased expression may be associated with human cancer.
