#### **GRIGENE** Kindlin 2 (FERMT2) Rabbit Polyclonal Antibody – TA376205

Background:Scaffolding protein that enhances integrin activation mediated by TLN1 and/or TLN2, but<br/>activates integrins only weakly by itself. Binds to membranes enriched in phosphoinositides.<br/>Enhances integrin-mediated cell adhesion onto the extracellular matrix and cell spreading;<br/>this requires both its ability to interact with integrins and with phospholipid membranes.<br/>Required for the assembly of focal adhesions. Participates in the connection between<br/>extracellular matrix adhesion sites and the actin cytoskeleton and also in the orchestration of<br/>actin assembly and cell shape modulation. Recruits FBLIM1 to focal adhesions. Plays a role in<br/>the TGFB1 and integrin signaling pathways. Stabilizes active CTNNB1 and plays a role in the<br/>regulation of transcription mediated by CTNNB1 and TCF7L2/TCF4 and in Wnt signaling.
