# Product datasheet for TA377821S

## **KIR3DS1 Rabbit Polyclonal Antibody**

### **Product data:**

Product Type:	Primary Antibodies
Applications:	ELISA, IHC, WB
Recommended Dilution:	WB,1:500 - 1:2000 IHC-P,1:50 - 1:200 ELISA,Recommended starting concentration is 1 µg/mL. Please optimize the concentration based on your specific assay requirements.
Reactivity:	Human, Mouse, Rat
Modifications:	Unmodified
Host:	Rabbit
lsotype:	IgG
Clonality:	Polyclonal
Formulation:	Buffer: PBS with 0.02% sodium azide,50% glycerol,pH7.3.
Concentration:	lot specific
Purification:	Affinity purification
Conjugation:	Unconjugated
Storage:	Store at -20°C. Avoid freeze / thaw cycles.
Stability:	Shelf life: one year from despatch.
Predicted Protein Size:	42kDa
Gene Name:	killer cell immunoglobulin like receptor, three lg domains and short cytoplasmic tail 1
Database Link:	<u>Entrez Gene 3813 Human</u> <u>Q14943</u>

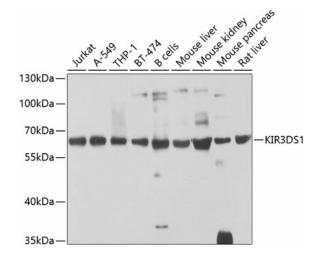

This product is to be used for laboratory only. Not for diagnostic or therapeutic use. ©2025 OriGene Technologies, Inc., 9620 Medical Center Drive, Ste 200, Rockville, MD 20850, US

#### **GRIGENE** KIR3DS1 Rabbit Polyclonal Antibody – TA377821S

Background:Killer cell immunoglobulin-like receptors (KIRs) are transmembrane glycoproteins expressed<br/>by natural killer cells and subsets of T cells. The KIR genes are polymorphic and highly<br/>homologous and they are found in a cluster on chromosome 19q13.4 within the 1 Mb<br/>leukocyte receptor complex (LRC). The gene content of the KIR gene cluster varies among<br/>haplotypes, although several "framework" genes are found in all haplotypes (KIR3DL3,<br/>KIR3DP1, KIR3DL4, KIR3DL2). The KIR proteins are classified by the number of extracellular<br/>immunoglobulin domains (2D or 3D) and by whether they have a long (L) or short (S)<br/>cytoplasmic domain. KIR proteins with the long cytoplasmic domain transduce inhibitory<br/>signals upon ligand binding via an immune tyrosine-based inhibitory motif (ITIM), while KIR<br/>proteins with the short cytoplasmic domain lack the ITIM motif and instead associate with the<br/>TYRO protein tyrosine kinase binding protein to transduce activating signals. The ligands for<br/>several KIR proteins are subsets of HLA class I molecules; thus, KIR proteins are thought to<br/>play an important role in regulation of the immune response. Alternatively spliced transcript<br/>variants encoding different isoforms have been found for this gene.

Synonyms: CD158E2; KIR-123FM; KIR-G1; MGC119726; MGC119728; MGC125316; NKAT10

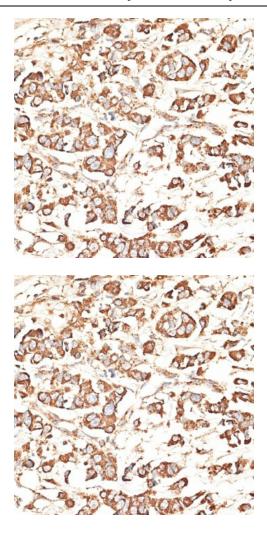

#### **Product images:**

Western blot analysis of various lysates using KIR3DS1 Rabbit pAb ([TA377821]) at 1:1000 dilution. Secondary antibody: HRP-conjugated Goat anti-

Rabbit IgG (H+L) (AS014) at 1:10000 dilution. Lysates/proteins: 25µg per lane. Blocking buffer: 3% nonfat dry milk in TBST. Detection: ECL Basic Kit (RM00020). Exposure time: 60s.
