

Product datasheet for TA378181

LYRM1 Rabbit Polyclonal Antibody

Product data:

Product Type: Primary Antibodies

Applications: WB

Recommended Dilution: WB,1:200 - 1:2000

Reactivity: Mouse

Modifications: Unmodified

Host: Rabbit Isotype: **IgG**

Clonality: Polyclonal

Immunogen: Recombinant fusion protein containing a sequence corresponding to amino acids 1-122 of

human LYRM1 (NP_065157.1).

Formulation: Buffer: PBS with 0.02% sodium azide,50% glycerol,pH7.3.

Concentration: lot specific

Purification: Affinity purification

Conjugation: Unconjugated

Storage: Store at -20°C. Avoid freeze / thaw cycles.

Stability: Shelf life: one year from despatch.

Predicted Protein Size: 14kDa

LYR motif containing 1 Gene Name:

Database Link: 043325

Background: The protein encoded by this gene belongs to the mitochondrial leucine/tyrosine/arginine

motif family of proteins. Proteins of this family are short polypeptides that contain a

leucine/tyrosine/arginine motif near the N-terminus. This gene is widely expressed with high

levels in omental adipose tissue of obese individuals. In adipose tissue, the protein is

localized to the nucleus where it promotes preadipocyte proliferation and lowers the rate of apoptosis to regulate adipose tissue homeostasis. Overexpression of this gene in adipocytes causes abnormal mitochondrial morphology and mitochondrial dysfunction. Alternative

splicing results in multiple transcript variants.
