| Product Type:           | Primary Antibodies                                                                                    |
|-------------------------|-------------------------------------------------------------------------------------------------------|
| Applications:           | IHC, WB                                                                                               |
| Recommended Dilution:   | WB,1:1000 - 1:3000<br>IHC,1:50 - 1:200                                                                |
| Reactivity:             | Human, Mouse, Rat                                                                                     |
| Modifications:          | Unmodified                                                                                            |
| Host:                   | Rabbit                                                                                                |
| lsotype:                | IgG                                                                                                   |
| Clonality:              | Polyclonal                                                                                            |
| Immunogen:              | A synthetic peptide corresponding to a sequence within amino acids 1-100 of human MEK1 (NP_002746.1). |
| Formulation:            | Buffer: PBS with 0.02% sodium azide,50% glycerol,pH7.3.                                               |
| Concentration:          | lot specific                                                                                          |
| Purification:           | Affinity purification                                                                                 |
| Conjugation:            | Unconjugated                                                                                          |
| Storage:                | Store at -20°C. Avoid freeze / thaw cycles.                                                           |
| Stability:              | Shelf life: one year from despatch.                                                                   |
| Predicted Protein Size: | 40kDa/43kDa                                                                                           |
| Gene Name:              | mitogen-activated protein kinase kinase 1                                                             |
| Database Link:          | <u>Entrez Gene 5604 Human</u><br><u>Q02750</u>                                                        |

#### **GRIGENE** MEK1 (MAP2K1) Rabbit Polyclonal Antibody – TA378242

# Background: The protein encoded by this gene is a member of the dual specificity protein kinase family, which acts as a mitogen-activated protein (MAP) kinase kinase. MAP kinases, also known as extracellular signal-regulated kinases (ERKs), act as an integration point for multiple biochemical signals. This protein kinase lies upstream of MAP kinases and stimulates the enzymatic activity of MAP kinases upon wide variety of extra- and intracellular signals. As an essential component of MAP kinase signal transduction pathway, this kinase is involved in many cellular processes such as proliferation, differentiation, transcription regulation and development.

#### Synonyms:

MAPKK1; MEK1; MKK1; PRKMK1

### **Product images:**

Western blot analysis of extracts from normal (control) and MEK1 knockout (KO) HeLa cells, using MEK1 antibody (TA378242) at 1:1000 dilution. | Secondary antibody: HRP Goat Anti-Rabbit IgG (H+L) at 1:10000 dilution. | Lysates/proteins: 25ug per lane. | Blocking buffer: 3% nonfat dry milk in TBST. | Detection: ECL Basic Kit . | Exposure time: 5s.

Western blot analysis of extracts of various cell lines, using MEK1 antibody (TA378242) at 1:3000 dilution. | Secondary antibody: HRP Goat Anti-Rabbit IgG (H+L) at 1:10000 dilution. | Lysates/proteins: 25ug per lane. | Blocking buffer: 3% nonfat dry milk in TBST. | Detection: ECL Enhanced Kit . | Exposure time: 90s.
