# Product datasheet for TA379649

## **PATZ1 Rabbit Polyclonal Antibody**

### **Product data:**

Product Type:	Primary Antibodies
Applications:	ELISA, WB
Recommended Dilution:	WB,1:1000 - 1:5000 ELISA,Recommended starting concentration is 1 $\mu$ g/mL. Please optimize the concentration based on your specific assay requirements.
Reactivity:	Human, Mouse, Rat
Modifications:	Unmodified
Host:	Rabbit
lsotype:	IgG
Clonality:	Polyclonal
Formulation:	Buffer: PBS with 0.02% sodium azide,50% glycerol,pH7.3.
Concentration:	lot specific
Purification:	Affinity purification
Conjugation:	Unconjugated
Storage:	Store at -20°C. Avoid freeze / thaw cycles.
Stability:	Shelf life: one year from despatch.
Predicted Protein Size:	74kDa
Gene Name:	POZ/BTB and AT hook containing zinc finger 1
Database Link:	<u>Entrez Gene 23598 Human</u> <u>Q9HBE1</u>

This product is to be used for laboratory only. Not for diagnostic or therapeutic use. ©2025 OriGene Technologies, Inc., 9620 Medical Center Drive, Ste 200, Rockville, MD 20850, US

#### **GRIGENE** PATZ1 Rabbit Polyclonal Antibody – TA379649

Background:The protein encoded by this gene contains an A-T hook DNA binding motif which usually<br/>binds to other DNA binding structures to play an important role in chromatin modeling and<br/>transcription regulation. Its Poz domain is thought to function as a site for protein-protein<br/>interaction and is required for transcriptional repression, and the zinc-fingers comprise the<br/>DNA binding domain. Since the encoded protein has typical features of a transcription factor,<br/>it is postulated to be a repressor of gene expression. In small round cell sarcoma, this gene is<br/>fused to EWS by a small inversion of 22q, then the hybrid is thought to be translocated<br/>(t(1;22)(p36.1;q12). The rearrangement of chromosome 22 involves intron 8 of EWS and exon<br/>1 of this gene creating a chimeric sequence containing the transactivation domain of EWS<br/>fused to zinc finger domain of this protein. This is a distinct example of an intra-<br/>chromosomal rearrangement of chromosome 22. Four alternatively spliced transcript<br/>variants are described for this gene.

Synonyms:

dJ400N23; MAZR; PATZ; RIAZ; ZBTB19; ZNF278; ZSG
