Product datasheet for TA380295

PRDM14 Rabbit Polyclonal Antibody

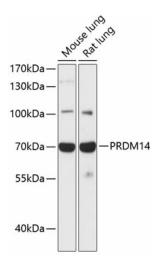

Product data:

ApplicationIHC, WBRecommended DilutionWB, 1:500 - 1:200 IHC, 1:50 - 1:200Reactivity:Human, Mouse, RatModifications:UnmodifiedHost:RabbitIsotype:IgGClonality:PolyclonalImmunogen:Recombinant fusion protein containing a sequence corresponding to amino acids 1-260 of muman PRDM14 (NP_078780.1).Formulation:Buffer: PBS with 0.02% sodium azide,50% glycerol,pH7.3.Concentration:Buffer: PBS with 0.02% sodium azide,50% glycerol,pH7.3.Congigation:UnconjugatedStorage:Storage:Stability:Shell life: one year from despatch.Predicted ProteinSize:Formuna 14Patabase Link:Entre Gene 63978 Human OrgZV8Background:This gene encodes a member of the PRDI-BF1 and RIZ homology domain containing (PRDM) arinity of transcriptional regulators. The encoded protein may possess histone methyltransferase activity and plays a critical role in cell pluriptency by suppressing the expression of differentiation marker genes. Expression of this gene many plays a critical role in cell pluriptency by suppressing the expression of differentiation marker genes. Expression of this gene many plays a critical role in cell pluriptency by suppressing the expression of differentiation marker genes. Expression of this gene many plays a critical role in cell pluriptency by suppressing the expression of differentiation marker genes. Expression of this gene many plays a critical role in cell pluriptency by suppressing the expression of differentiation marker genes. Expression of this gene many plays a critical role in cell pluriptency by suppressing the expression of differentiation marker genes. Expr	Product Type:	Primary Antibodies
Recommended DilutionWB,1:500 - 1:2000 HC,1:50 - 1:200Reactivity:Human, Mouse, RatModifications:UnmodifiedHost:RabbitIsotype:IgGClonality:PolyclonalImmunogen:Recombinant fusion protein containing a sequence corresponding to amino acids 1-260 of human PRDM14 (NP_078780.1).Formulation:Buffer: PBS with 0.02% sodium azide,50% glycerol,pH7.3.Concentration:Iot specificPurification:Affinity purificationConjugatedStore at -20°C. Avoid freeze / thaw cycles.Storage:Store at -20°C. Avoid freeze / thaw cycles.Stability:Shelf life: one year from despatch.Predicted Protein SizeG4kDaGene Name:PR domain 14Database Link:Entrez Gene 63978 Human Q9GZV8Background:This gene encodes a member of the PRDI-BF1 and RIZ homology domain containing (PRDM) family of transcriptional regulators. The encoded protein may possess histone methyltransferase activity and plays a critical role in cell pluripotency by suppressing the expression of differentiation marker genes. Expression of this gene may play a role in breast cancer.	Applications:	IHC, WB
Modifications:UnmodifiedHost:RabbitIsotype:IgGClonality:PolyclonalImmunogen:Recombinant fusion protein containing a sequence corresponding to amino acids 1-260 of human PRDM14 (NP_078780.1).Formulation:Buffer: PBS with 0.02% sodium azide,50% glycerol,pH7.3.Concentration:Iot specificPurification:OnconjugatedStorage:Store at -20°C. Avoid freeze / thaw cycles.Stability:Shelf life: one year from despatch.Predicted Protein Size64kDaGene Name:PR domain 14Database Link:Entrez Gene 63978 Human OgGZV8Background:This gene encodes a member of the PRDI-BF1 and RIZ homology domain containing (PRDM) family of transcriptional regulators. The encoded protein may possess histone methyltransferase activity and plays a critical role in cell pluripotency by suppressing the expression of differentiation marker genes. Expression of this gene may play a role in breast cancer.	Recommended Dilution:	
Hose:RabbitIsotype:IgGClonality:PolyclonalImmunogen:Recombinant fusion protein containing a sequence corresponding to amino acids 1-260 of human PRDM14 (NP_078780.1).Formulation:Buffer: PBS with 0.02% sodium azide,50% glycerol,pH7.3.Fornentation:Iot specificFornulation:Iot specificPurification:Affinity purificationForngge:Store at -20°C. Avoid freeze / thaw cycles.Storage:Store at -20°C. Avoid freeze / thaw cycles.Fordieted Protein Size64kDaGene Name:PR domain 14Otabase Link:Entrez Gene G3978 Human CyoGZV8Background:This gene encodes a member of the PRDI-BF1 and RIZ homology domain containing (PRDM) methyltransferase activity and plays a critical role in cell pluripotency by suppressing the expression of differentiation marker genes. Expression of this gene many plays a critical role in cell pluripotency by suppressing the expression of differentiation marker genes. Expression of this gene many plays a critical role in cell pluripotency by suppressing the expression of differentiation marker genes. Expression of this gene many plays a critical role in cell pluripotency by suppressing the expression of differentiation marker genes. Expression of this gene genes.	Reactivity:	Human, Mouse, Rat
Isotype:IgGClonality:PolyclonalImmunogen:Recombinant fusion protein containing a sequence corresponding to amino acids 1-260 of human PRDM14 (NP_078780.1).Formulation:Buffer: PBS with 0.02% sodium azide,50% glycerol,pH7.3.Concentration:Iot specificPurification:Affinity purificationConjugation:UnconjugatedStorage:Store at -20°C. Avoid freeze / thaw cycles.Stability:Shelf life: one year from despatch.Predicted Protein SizeAfkDaGene Name:PR domain 14Database Link:Entrez Gene 63978 Human OgGZV8Background:Nis gene encodes a member of the PRDI-BF1 and RIZ homology domain containing (PRDM) family of transcriptional regulators. The encoded protein may possess histone methyltransferase activity and plays a critical role in cell pluripotency by suppressing the expression of differentiation marker genes. Expression of this gene may play a role in breast cancer.	Modifications:	Unmodified
Clonality:PolyclonalImmunogen:Recombinant fusion protein containing a sequence corresponding to amino acids 1-260 of human PRDM14 (NP_078780.1).Formulation:Buffer: PBS with 0.02% sodium azide,50% glycerol,pH7.3.Concentration:lot specificPurification:Affinity purificationConjugation:UnconjugatedStorage:Store at -20°C. Stability:Shelf life: one year from despatch.Predicted Protein Size:64kDaGene Name:PR domain 14Database Link:Entrez Gene 63978 Human Q9GZV8Background:This gene encodes a member of the PRDI-BF1 and RIZ homology domain containing (PRDM) family of transcriptional regulators. The encoded protein may possess histone methyltransferase activity and plays a critical role in cell pluripotency by suppressing the expression of differentiation marker genes. Expression of this gene may play a role in breast cancer.	Conjugation:	Unconjugated
Predicted Protein Size:64kDaGene Name:PR domain 14Database Link:Entrez Gene 63978 Human Q9GZV8Background:This gene encodes a member of the PRDI-BF1 and RIZ homology domain containing (PRDM) family of transcriptional regulators. The encoded protein may possess histone methyltransferase activity and plays a critical role in cell pluripotency by suppressing the expression of differentiation marker genes. Expression of this gene may play a role in breast cancer.	Storage:	Store at -20°C. Avoid freeze / thaw cycles.
Gene Name:PR domain 14Database Link:Entrez Gene 63978 Human Q9GZV8Background:This gene encodes a member of the PRDI-BF1 and RIZ homology domain containing (PRDM) family of transcriptional regulators. The encoded protein may possess histone methyltransferase activity and plays a critical role in cell pluripotency by suppressing the expression of differentiation marker genes. Expression of this gene may play a role in breast cancer.	Stability:	Shelf life: one year from despatch.
Database Link:Entrez Gene 63978 Human Q9GZV8Background:This gene encodes a member of the PRDI-BF1 and RIZ homology domain containing (PRDM) family of transcriptional regulators. The encoded protein may possess histone methyltransferase activity and plays a critical role in cell pluripotency by suppressing the expression of differentiation marker genes. Expression of this gene may play a role in breast cancer.	Predicted Protein Size:	64kDa
Q9GZV8Background:This gene encodes a member of the PRDI-BF1 and RIZ homology domain containing (PRDM) family of transcriptional regulators. The encoded protein may possess histone methyltransferase activity and plays a critical role in cell pluripotency by suppressing the expression of differentiation marker genes. Expression of this gene may play a role in breast cancer.	Gene Name:	PR domain 14
family of transcriptional regulators. The encoded protein may possess histone methyltransferase activity and plays a critical role in cell pluripotency by suppressing the expression of differentiation marker genes. Expression of this gene may play a role in breast cancer.	Database Link:	
Synonyms: MGC59730; PFM11	Background:	family of transcriptional regulators. The encoded protein may possess histone methyltransferase activity and plays a critical role in cell pluripotency by suppressing the expression of differentiation marker genes. Expression of this gene may play a role in breast
	Synonyms:	MGC59730; PFM11
