

# Product datasheet for TA380367

# PKC gamma (PRKCG) Rabbit Polyclonal Antibody

# **Product data:**

#### **Product Type: Primary Antibodies Applications:** ELISA, ICC/IF, WB Recommended Dilution: WB.1:500 - 1:2000 IF/ICC,1:50 - 1:200 ELISA, Recommended starting concentration is 1 µg/mL. Please optimize the concentration based on your specific assay requirements. **Reactivity:** Human, Mouse, Rat Modifications: Unmodified Host: Rabbit Isotype: lgG **Clonality:** Polyclonal Formulation: Buffer: PBS with 0.09% Sodium azide,50% glycerol,pH7.3. Concentration: lot specific **Purification:** Affinity purification **Conjugation:** Unconjugated Store at -20°C. Avoid freeze / thaw cycles. Storage: Stability: Shelf life: one year from despatch. Predicted Protein Size: 78kDa protein kinase C gamma Gene Name: Database Link: Entrez Gene 5582 Human P05129

### Science PKC gamma (PRKCG) Rabbit Polyclonal Antibody – TA380367

Background:Protein kinase C (PKC) is a family of serine- and threonine-specific protein kinases that can be<br/>activated by calcium and second messenger diacylglycerol. PKC family members<br/>phosphorylate a wide variety of protein targets and are known to be involved in diverse<br/>cellular signaling pathways. PKC also serve as major receptors for phorbol esters, a class of<br/>tumor promoters. Each member of the PKC family has a specific expression profile and is<br/>believed to play distinct roles in cells. The protein encoded by this gene is one of the PKC<br/>family members. This protein kinase is expressed solely in the brain and spinal cord and its<br/>localization is restricted to neurons. It has been demonstrated that several neuronal<br/>functions, including long term potentiation (LTP) and long term depression (LTD), specifically<br/>require this kinase. Knockout studies in mice also suggest that this kinase may be involved in<br/>neuropathic pain development. Defects in this protein have been associated with<br/>neurodegenerative disorder spinocerebellar ataxia-14 (SCA14). Two transcript variants<br/>encoding different isoforms have been found for this gene.

Synonyms:

MGC57564; PKC-gamma; PKCC; PKCG; SCA14

## **Product images:**

Western blot analysis of various lysates using PKC gamma Rabbit pAb (TA380367) at 1:500 dilution.\_Secondary antibody: HRP-conjugated Goat anti-Rabbit IgG (H+L) (AS014) at 1:10000 dilution.\_Lysates/proteins: 25µg per lane.\_Blocking buffer: 3% nonfat dry milk in TBST.\_Detection: ECL Basic Kit (RM00020).\_Exposure time: 90s.
