Predicted Protein Size: 87kDa

**Gene Name:** protein kinase, cGMP-dependent, type II

Database Link: Q13237

**Background:** This gene encodes a protein that belongs to the serine/threonine protein kinase family of

proteins. The encoded protein binds to and inhibits the activation of several receptor tyrosine kinases. The membrane-bound protein is a regulator of intestinal secretion, bone growth and renin secretion. Alternate splicing results in multiple transcript variants encoding distinct isoforms whose regulatory N-termini differ in length but whose C-terminal catalytic domains

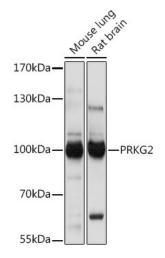

are identical.
