GRIGENE NeuN (RBFOX3) Rabbit Polyclonal Antibody – TA380762

Background:This gene encodes a member of the RNA-binding FOX protein family which is involved in the
regulation of alternative splicing of pre-mRNA. The protein has an N-terminal proline-rich
region, an RNA recognition motif (RRM) domain, and a C-terminal alanine-rich region. This
gene produces the neuronal nuclei (NeuN) antigen that has been widely used as a marker for
post-mitotic neurons. This gene has its highest expression in the central nervous system and
plays a prominent role in neural tissue development and regulation of adult brain function.
Mutations in this gene have been associated with numerous neurological disorders.
Alternative splicing of this gene results in multiple transcript variants encoding distinct
isoforms.

Synonyms: Fox-3; Hrnbp3; NeuN; Neun; Neuna60; RGD1560070
