#### SARS2 Rabbit Polyclonal Antibody – TA381256

Background:This gene encodes the mitochondrial seryl-tRNA synthethase precursor, a member of the<br/>class II tRNA synthetase family. The mature enzyme catalyzes the ligation of Serine to<br/>tRNA(Ser) and participates in the biosynthesis of selenocysteinyl-tRNA(sec) in mitochondria.<br/>The enzyme contains an N-terminal tRNA binding domain and a core catalytic domain. It<br/>functions in a homodimeric form, which is stabilized by tRNA binding. This gene is regulated<br/>by a bidirectional promoter that also controls the expression of mitochondrial ribosomal<br/>protein S12. Both genes are within the critical interval for the autosomal dominant deafness<br/>locus DFNA4 and might be linked to this disease. Multiple transcript variants encoding<br/>different isoforms have been identified for this gene.

Synonyms: FLJ20450; mtSerRS; SARS; SARSM; SerRSmt; SERS; SYS
