

# **Product datasheet for TA381272S**

## LIMPII (SCARB2) Rabbit Polyclonal Antibody

## Product data:

#### OriGene Technologies, Inc.

9620 Medical Center Drive, Ste 200 Rockville, MD 20850, US Phone: +1-888-267-4436 https://www.origene.com techsupport@origene.com EU: info-de@origene.com CN: techsupport@origene.cn

Product Type:	Primary Antibodies
Applications:	ELISA, ICC/IF, WB
Recommended Dilution:	WB,1:1000 - 1:3000 IF/ICC,1:50 - 1:200 ELISA,Recommended starting concentration is 1 µg/mL. Please optimize the concentration based on your specific assay requirements.
Reactivity:	Human, Mouse, Rat
Modifications:	Unmodified
Host:	Rabbit
lsotype:	IgG
Clonality:	Polyclonal
Formulation:	Buffer: PBS with 0.02% sodium azide,50% glycerol,pH7.3.
Concentration:	lot specific
Purification:	Affinity purification
Conjugation:	Unconjugated
Storage:	Store at -20°C. Avoid freeze / thaw cycles.
Stability:	Shelf life: one year from despatch.
Predicted Protein Size:	54kDa
Gene Name:	scavenger receptor class B member 2
Database Link:	<u>Entrez Gene 950 Human</u> <u>Q14108</u>

This product is to be used for laboratory only. Not for diagnostic or therapeutic use. ©2025 OriGene Technologies, Inc., 9620 Medical Center Drive, Ste 200, Rockville, MD 20850, US

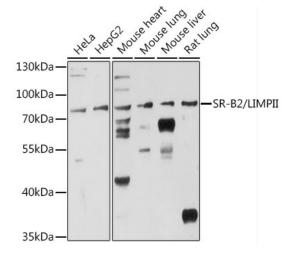

#### SCARB2) Rabbit Polyclonal Antibody – TA381272S

Background:The protein encoded by this gene is a type III glycoprotein that is located primarily in limiting<br/>membranes of lysosomes and endosomes. Earlier studies in mice and rat suggested that this<br/>protein may participate in membrane transportation and the reorganization of<br/>endosomal/lysosomal compartment. The protein deficiency in mice was reported to impair<br/>cell membrane transport processes and cause pelvic junction obstruction, deafness, and<br/>peripheral neuropathy. Further studies in human showed that this protein is a ubiquitously<br/>expressed protein and that it is involved in the pathogenesis of HFMD (hand, foot, and mouth<br/>disease) caused by enterovirus-71 and possibly by coxsackievirus A16. Mutations in this gene<br/>caused an autosomal recessive progressive myoclonic epilepsy-4 (EPM4), also known as<br/>action myoclonus-renal failure syndrome (AMRF). Alternatively spliced transcript variants<br/>encoding different isoforms have been found for this gene.

Synonyms:

AMRF; CD36L2; HLGP85; LGP85; LIMPII; SR-BII

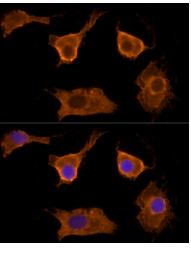

### **Product images:**

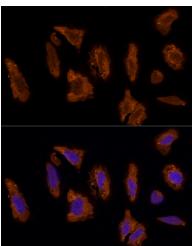

Western blot analysis of various lysates using SR-B2/LIMPII Rabbit pAb ([TA381272]) at 1:3000 dilution. Secondary antibody: HRP-conjugated Goat anti-Rabbit IgG (H+L) (AS014) at 1:10000 dilution. Lysates/proteins: 25µg per lane. Blocking buffer: 3% nonfat dry milk in TBST. Detection: ECL Basic Kit (RM00020). Exposure time: 30s.
