

Product datasheet for TA381535

Slc10a1 Rabbit Polyclonal Antibody

Product data:

Product Type: Primary Antibodies

Applications: WB

Recommended Dilution: WB.1:500 - 1:2000

Reactivity: Human

Modifications: Unmodified

Host: Rabbit Isotype: **IgG**

Clonality: Polyclonal

Immunogen: Recombinant fusion protein containing a sequence corresponding to amino acids 244-349 of

mouse SLC10A1 (O08705).

Buffer: PBS with 0.02% sodium azide,50% glycerol,pH7.3. Formulation:

Concentration: lot specific

Purification: Affinity purification

Conjugation: Unconjugated

Storage: Store at -20°C. Avoid freeze / thaw cycles.

Stability: Shelf life: one year from despatch.

Predicted Protein Size: 39kDa

solute carrier family 10 (sodium/bile acid cotransporter family), member 1 Gene Name:

Database Link: 008705

Background: The protein encoded by this gene belongs to the sodium/bile acid cotransporter family, which

> are integral membrane glycoproteins that participate in the enterohepatic circulation of bile acids. Two homologous transporters are involved in the reabsorption of bile acids; the ileal sodium/bile acid cotransporter with an apical cell localization that absorbs bile acids from the intestinal lumen, bile duct and kidney, and the liver-specific sodium/bile acid cotransporter, represented by this protein, that is found in the basolateral membranes of hepatocytes. Bile acids are the catabolic product of cholesterol metabolism, hence this protein is important for

cholesterol homeostasis.
