# Product datasheet for TA382558

## **TKTL1 Rabbit Polyclonal Antibody**

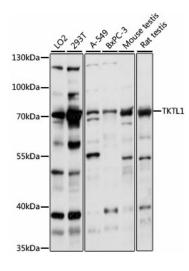

#### **Product data:**

| Product Type:           | Primary Antibodies  |
|-------------------------|---|
| Applications:           | WB  |
| Recommended Dilution:   | WB,1:200 - 1:2000   |
| Reactivity:             | Human, Mouse, Rat   |
| Modifications:          | Unmodified  |
| Host:                   | Rabbit  |
| lsotype:                | IgG   |
| Clonality:              | Polyclonal  |
| Immunogen:              | Recombinant fusion protein containing a sequence corresponding to amino acids 220-340 of human TKTL1 (NP_036385.3).   |
| Formulation:            | Buffer: PBS with 0.02% sodium azide,50% glycerol,pH7.3.   |
| Concentration:          | lot specific  |
| Purification:           | Affinity purification   |
| Conjugation:            | Unconjugated  |
| Storage:                | Store at -20°C. Avoid freeze / thaw cycles.   |
| Stability:              | Shelf life: one year from despatch.   |
| Predicted Protein Size: | 59kDa/61kDa/65kDa   |
| Gene Name:              | transketolase-like 1  |
| Database Link:          | <u>Entrez Gene 8277 Human</u><br><u>P51854</u>  |
| Background:             | The protein encoded by this gene is a transketolase that acts as a homodimer and catalyzes<br>the conversion of sedoheptulose 7-phosphate and D-glyceraldehyde 3-phosphate to D-ribose<br>5-phosphate and D-xylulose 5-phosphate. This reaction links the pentose phosphate pathway<br>with the glycolytic pathway. Variations in this gene may be the cause of Wernicke-Korsakoff<br>syndrome. Three transcript variants encoding different isoforms have been found for this<br>gene. |
| Synonyms:               | TKR; TKT2; transketolase-2  |
