

# Product datasheet for TA382682S

# Troponin T1 (TNNT1) Rabbit Polyclonal Antibody

## **Product data:**

#### **Product Type: Primary Antibodies Applications:** ELISA, WB Recommended Dilution: WB.1:500 - 1:2000 ELISA, Recommended starting concentration is 1 µg/mL. Please optimize the concentration based on your specific assay requirements. **Reactivity:** Human Unmodified Modifications: Rabbit Host: Isotype: lgG **Clonality:** Polyclonal Formulation: Buffer: PBS with 0.02% sodium azide,50% glycerol,pH7.3. Concentration: lot specific Purification: Affinity purification **Conjugation:** Unconjugated Store at -20°C. Avoid freeze / thaw cycles. Storage: Stability: Shelf life: one year from despatch. **Predicted Protein Size:** 33kDa Gene Name: troponin T1, slow skeletal type Database Link: Entrez Gene 7138 Human P13805

### **GRIGENE** Troponin T1 (TNNT1) Rabbit Polyclonal Antibody – TA382682S

Background:This gene encodes a protein that is a subunit of troponin, which is a regulatory complex<br/>located on the thin filament of the sarcomere. This complex regulates striated muscle<br/>contraction in response to fluctuations in intracellular calcium concentration. This complex is<br/>composed of three subunits: troponin C, which binds calcium, troponin T, which binds<br/>tropomyosin, and troponin I, which is an inhibitory subunit. This protein is the slow skeletal<br/>troponin T subunit. Mutations in this gene cause nemaline myopathy type 5, also known as<br/>Amish nemaline myopathy, a neuromuscular disorder characterized by muscle weakness and<br/>rod-shaped, or nemaline, inclusions in skeletal muscle fibers which affects infants, resulting<br/>in death due to respiratory insufficiency, usually in the second year. Multiple transcript<br/>variants encoding different isoforms have been found for this gene.

Synonyms:

ANM; FLJ98147; MGC104241; STNT; TNT; TNTS

### **Product images:**

Western blot analysis of various lysates using TNNT1 Rabbit pAb ([TA382682]) at 1:1000 dilution. Secondary antibody: HRP-conjugated Goat anti-Rabbit IgG (H+L) (AS014) at 1:10000 dilution. Lysates/proteins: 25µg per lane. Blocking buffer: 3% nonfat dry milk in TBST. Detection: ECL Basic Kit (RM00020). Exposure time: 15s.
