TRPM7 Rabbit Polyclonal Antibody

Product data:

Product Type: Primary Antibodies

Applications: ELISA, WB

Recommended Dilution: WB,1:500 - 1:2000

ELISA,Recommended starting concentration is 1 μg/mL. Please optimize the concentration

based on your specific assay requirements.

Reactivity: Mouse

Modifications: Unmodified

Host: Rabbit Isotype: IgG

Isotype: IgG

Clonality: Polyclonal

Formulation: Buffer: PBS with 0.02% sodium azide,50% glycerol,pH7.3.

Concentration: lot specific

Purification: Affinity purification

Conjugation: Unconjugated

Storage: Store at -20°C. Avoid freeze / thaw cycles.

Stability: Shelf life: one year from despatch.

Predicted Protein Size: 213kDa

Gene Name: transient receptor potential cation channel subfamily M member 7

Database Link: Q96QT4

Background: This gene belongs to the melastatin subfamily of transient receptor potential family of ion

channels. The protein encoded by this gene is both an ion channel and a serine/threonine protein kinase. The kinase activity is essential for the ion channel function, which serves to increase intracellular calcium levels and to help regulate magnesium ion homeostasis. The encoded protein is involved in cytoskeletal organization, cell adhesion, cell migration and

organogenesis. Defects in this gene are a cause of amyotrophic lateral sclerosis-

parkinsonism/dementia complex of Guam. The gene may also be associated with defects of

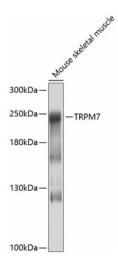

cardiac function.

Synonyms: CHAK; CHAK1; FLJ20117; FLJ25718; LTRPC7; TRP-PLIK
