Background:	Swiss-Prot Acc.P61626.Lysozymes have primarily a bacteriolytic function; those in tissues and body fluids are associated with the monocyte-macrophage system and enhance the activity of immunoagents.MiscellaneousLysozyme C is capable of both hydrolysis and transglycosylation; it shows also a slight esterase activity. It acts rapidly on both peptide- substituted and unsubstituted peptidoglycan, and slowly on chitin oligosaccharides.
Synonyms:	lysozyme; LZM
