### **CRIGENE** TRIM56 Rabbit Monoclonal Antibody [Clone ID: R02-8A3] – TA385466S

Background:Swiss-Prot Acc.Q9BRZ2.E3 ubiquitin-protein ligase that plays a key role in innate antiviral<br/>immunity (PubMed:21289118). In response to pathogen- and host-derived double-stranded<br/>DNA (dsDNA), targets TMEM173/STING to 'Lys-63'-linked ubiquitination, thereby promoting its<br/>homodimerization, a step required for the production of type I interferon IFN-beta .<br/>Independently of its E3 ubiquitin ligase activity, positive regulator of TLR3 signaling.<br/>Potentiates extracellular double stranded RNA (dsRNA)-induced expression of IFNB1 and<br/>interferon-stimulated genes ISG15, IFIT1/ISG56, CXCL10, OASL and CCL5/RANTES. Promotes<br/>establishment of an antiviral state by TLR3 ligand and TLR3-mediated chemokine induction<br/>following infection by hepatitis C virus (PubMed:22948160).
