#### **CRIGENE** TXNRD1 Rabbit Polyclonal Antibody – TA385501M

Background:Swiss-Prot Acc.Q16881.Isoform 1 may possess glutaredoxin activity as well as thioredoxin<br/>reductase activity and induces actin and tubulin polymerization, leading to formation of cell<br/>membrane protrusions. Isoform 4 enhances the transcriptional activity of estrogen receptors<br/>alpha and beta while isoform 5 enhances the transcriptional activity of the beta receptor only.<br/>Isoform 5 also mediates cell death induced by a combination of interferon-beta and retinoic<br/>acid.
