

Product datasheet for **TA386269**

Her2 (ERBB2) Rabbit Monoclonal Antibody [Clone ID: FWP51]

Product data:

Product Type:	Primary Antibodies
Clone Name:	FWP51
Applications:	FC, IF, IP
Reactivity:	Human
Host:	Rabbit
Isotype:	IgG, kappa
Clonality:	Monoclonal
Immunogen:	20x10 ⁶ SKBR3 human breast tumour cells were injected into BALB/c mice. The hybridomas generated from the mice spleen cells were then screen for antibodies reactive to c-erbB-2 using immunofluorescence and immunoprecipitation.
Specificity:	FWP51 binds to the extracellular domain of c-erbB-2.

Immunofluorescence and immunoprecipitation were used to confirm the specificity of FWP51 for c-erbB-2 (Harwerth et al, 1992). Flow cytometry showed that FWP51 binds the extracellular domain of c-erbB-2 (Harwerth et al, 1992). FWP51 has also been fused to the bacterial toxin, exotoxin A. The resultant fusion protein Fv(FWP51)-ETA selectively inhibited protein synthesis in cells expressing high levels of human c-erbB-2 protein, but not in cells expressing little to no human c-erbB-2 protein. Administration of FWP51 to mice impanted with human erbB-2 transformed NIH3T3 cells led to inhibition of the onset of tumour growth (Harwerth et al, 1993).

Formulation:	PBS with 0.02% Proclin 300.
Concentration:	lot specific
Conjugation:	Unconjugated
Storage:	Please store at 4°C for up to 3 months. For longer storage, aliquot and store at -20°C. Avoid freeze and thaw cycles.
Stability:	3 years from dispatch.
Gene Name:	erb-b2 receptor tyrosine kinase 2
Database Link:	Entrez Gene 2064 Human P04626

Synonyms: C-erbB-2; CD340; erbB-2; HER-2; HER-2/neu; HER2; herstatin; NEU; NGL; p185erbB2; TKR1

Note: This chimeric rabbit antibody was made using the variable domain sequences of the original Mouse IgG1 format, for improved compatibility with existing reagents, assays and techniques.
