

Product datasheet for **TA388952**

Rabbit Polyclonal Antibody

Product data:

Product Type:	Primary Antibodies
Applications:	ELISA, WB
Recommended Dilution:	<p>Sandwich ELISA: To detect Human IL-36 gamma by sandwich ELISA (using 100 ml/well), a concentration of 0.25 – 1.0 µg/ml of this antibody is required. This biotinylated polyclonal antibody, in conjunction with ProSci's Polyclonal Anti- Human IL-36 gamma as a capture antibody, allows the detection of at least 0.2 – 0.4 ng/well of recombinant Human IL-36 gamma.</p> <p>Western Blot</p> <p>To detect Human IL-36 gamma by Western Blot analysis, this antibody can be used at a concentration of 0.1 - 0.2 mg/ml. When used in conjunction with compatible development reagents, the detection limit for recombinant Human IL-36 gamma is 1.5 – 3.0 ng/lane, under either reducing or non-reducing conditions.</p>
Reactivity:	Human
Host:	Rabbit
Clonality:	Polyclonal
Immunogen:	Produced from sera of rabbits immunized with highly pure recombinant Human IL-36 gamma. Anti-Human IL-36 gamma-specific antibody was purified by affinity chromatography and then biotinylated.
Concentration:	lot specific
Purification:	IL-36 gamma-specific antibody was purified by affinity chromatography and then biotinylated
Conjugation:	Biotin
Storage:	Store at -20°C as received.
Stability:	Stable for 12 months from date of receipt.
