# **AREG Rabbit Polyclonal Antibody**

### **Product data:**

**Product Type:** Primary Antibodies

**Applications:** ELISA, WB

Recommended Dilution: Sandwich ELISA: To detect Human Amphiregulin by sandwich ELISA (using 100ul/well), a

concentration of 0.5-2.0  $\mu$ g/ml of this antibody is required. This antigen affinity purified antibody, in conjunction with ProSci's Biotinylated Anti-Human Amphiregulin as a detection

antibody, allows the detection of at least 2000-4000 pg/ml of Recombinant Human

Amphiregulin. Western Blot

To detect Human Amphiregulin by Western Blot analysis this antibody can be used at a concentration of 0.1-0.2 µg/ml. When used in conjunction with compatible secondary reagents, the detection limit for Recombinant Human Amphiregulin is 1.5-3.0 ng/lane, under

reagenes, the detection in the for recombinant harman Amprili egain is 1.5

either reducing or non-reducing conditions.

Reactivity: Human

Host: Rabbit

Clonality: Polyclonal

**Immunogen:** Produced from sera of rabbits immunized with highly pure Recombinant Human

Amphiregulin. Anti-Human Amphiregulin-specific antibody was purified by affinity

chromatography employing an immobilized Human Amphiregulin matrix.

**Concentration:** lot specific

**Purification:** Amphiregulin-specific antibody was purified by affinity chromatography employing an

immobilized Human Amphiregulin matrix

Conjugation: Unconjugated

**Storage:** Store at -20°C as received.

**Stability:** Stable for 12 months from date of receipt.

Database Link: P15514

### Background:

Amphiregulin is an EGF related growth factor that signals through the EGF/TGF-alpha receptor, and stimulates growth of keratinocytes, epithelial cells and some fibroblasts. Amphiregulin also inhibits the growth of certain carcinoma cell lines. Synthesized as a transmembrane protein, Amphiregulin's extracellular domain is proteolytically processed to release the mature protein. There are 6 conserved cysteine residues, which form 3 intramolecular disulfide bonds essential for biological activity. Recombinant Human Amphiregulin is an 11.3 kDa glycoprotein consisting of 98 amino acid residues.
