

Product datasheet for TA389069

CASP6 Mouse Antibody [Clone ID: M378]

Product data:

Product Type: Primary Antibodies

Clone Name: M378 Applications: WB

Recommended Dilution: WB: 1:250

Reactivity: Human
Host: Mouse
Isotype: IgG1

Immunogen: Clone (M378) was generated from a peptide containing amino acid residues in the C-terminal

region of human Caspase-6.

Specificity: The antibody detects a 34 kDa* protein corresponding to the molecular weight of Caspase-6

on SDS-PAGE immunoblots of human Jurkat, K562, and A431 cells.

Formulation: PBS + 1 mg/ml BSA, 0.05% NaN3 and 50% glycerol

Concentration: lot specific

Purification: Protein A Purified

Conjugation: Unconjugated

Storage: Storage at -20°C is recommended, as aliquots may be taken without freeze/thawing due to

presence of 50% glycerol. Stable for at least 1 year at -20°C.

Stability: After date of receipt, stable for at least 1 year at -20°C.

Predicted Protein Size: 34

Database Link: P55212

Background: The caspases are a group of cysteine enzymes, which cleave proteins in response to intrinsic

and extrinsic pathways that cause apoptotic cell death. The caspases can be grouped into two subgroups based on their roles in apoptosis. Initiator caspases (caspases 2, 8, 9, and 10) are activated through the apoptosis-signaling pathways and activate the effector caspases (caspases 3, 6, and 7) which carry out apoptosis. Caspase cascades are initiated through assembly of multiprotein complexes that trigger activation of the initiator caspases, which are

then released and are able to activate the downstream effector caspases.

Note: Protein G purified tissue culture supernatant.
