| Product Type:         | Primary Antibodies  |
|-----------------------|---|
| Clone Name:           | DM81  |
| Applications:         | ELISA, FC   |
| Recommended Dilution: | ELISA 1:5000-10000<br>Flow Cyt 1:100  |
| Reactivity:           | Human   |
| Host:                 | Rabbit  |
| lsotype:              | IgG   |
| Clonality:            | Monoclonal  |
| Formulation:          | 1XPBS   |
| Concentration:        | Lot specific  |
| Purification:         | Purified from cell culture supernatant by affinity chromatography   |
| Conjugation:          | Unconjugated  |
| Storage:              | Store at -20°C to -80°C for 12 months in lyophilized form. After reconstitution, if not intended for use within a month, aliquot and store at -80°C (Avoid repeated freezing and thawing).Lyophilized antibodies are shipped at ambient temperature.  |
| Stability:            | 12 months from date of despatch   |
| Background:           | The protein encoded by this gene belongs to the immunoglobulin superfamily, and TIM family<br>of proteins. CD4-positive T helper lymphocytes can be divided into types 1 (Th1) and 2 (Th2)<br>on the basis of their cytokine secretion patterns. Th1 cells are involved in cell-mediated<br>immunity to intracellular pathogens and delayed-type hypersensitivity reactions, whereas,<br>Th2 cells are involved in the control of extracellular helminthic infections and the promotion<br>of atopic and allergic diseases. This protein is a Th1-specific cell surface protein that regulates<br>macrophage activation, and inhibits Th1-mediated auto- and alloimmune responses, and<br>promotes immunological tolerance. |
| Synonyms:             | HAVCR2, TIM3, TIMD3, FLJ14428, KIM3   |
